

# VII International Symposium

# Baekeland 2019

15-18 October 2019  
Tarragona (Spain)

Tarragona is a city in the south of Catalonia, located on the shores of the Mediterranean coast with 14 km of beaches with warm waters and a mild climate all year round.

Founded in the 3rd century BC with the name of Tarraco, it has an important seaport and has an important Petrochemical Complex. The Romans made it the capital of the Tarraconense province, which is why it still conserves remarkable archaeological remains of this period that have been declared a World Heritage Site by UNESCO.

## Key Dates

The Universitat Rovira i Virgili (URV) is delighted to announce the 7th edition of Baekeland Conference (Baekeland 2019) to be held in October 15-18, 2019 in Tarragona (Spain) in honour of Prof. Leo Baekeland.

Baekeland 2019, with the specific title: "Strengthening academic and industrial networks", will be the latest in a series of successful meetings, the most recent one was held in Shanghai (2018) and preceded by Surrey (2016), Niagara Falls (2013), Toyohashi (2011), Antalya (2009), and Ghent (2007).

*The purpose of the meeting is to review the present trends and developments in all types of thermoset resins (not only phenolics) essentially from a R&D point of view. The following topics have been selected:*

- *Chemistry of thermosetting materials*
- *Micro and nano-structured thermosets*
- *Theory, modelling and simulation*
- *Thermosets with enhanced capabilities*
- *Novel curing processes*
- *Photopolymerization*
- *Applications of thermosets*
